EXPERIENCE

Freelance FullStack Developer, Founder (PZMK, Solo startup - Tinki AI) July 2025 - Jun 2026

- Introduced AI development workflows, analytics, and PM practices to improve product delivery and decision-making.
- Built a PWA version, implemented scalable SEO improvements, and developed AI-powered urban planning search.
- Founded an [education platform](#) reaching **1,000+** users, focused on Czech maturity and language learning.
- Drove distribution through social media, reaching **100,000+** Reddit views and **120,000+** TikTok views.
- Built AI features including chat and a content-generation system based on learner mistakes using harness.

Senior Frontend Developer (Exur Insurance Technologies) Nov 2022 - Apr 2025

- Onboarded **three enterprise** insurance clients, including brokers and agencies.
- Built a **multi-tenant B2B** insurance platform with OpenAPI documentation, PDF automation, and API support.
- Led a team of 3 developers and worked closely with founders on product and roadmap planning.

Medior Frontend Developer and Product Manager (Applifting) May 2020 - Jun 2022

- Contributed to the migration of Heureka's legacy frontend to React.js within a **6-month** timeline.
- Delivered frontend work across one enterprise project and two startup products.
- Took on PM responsibilities, including stakeholder communication, product discovery and analytics

PROJECTS

Mealcheck AI: One of the first AI-powered calorie-tracking apps (1,000+ downloads; 20+ active subscriptions) [Link](#)
