EDUCATION

- CTU FEE/CVUT FEL
Bachelor of Electrical Engineering and Computer Science
2024-current
- School42
C language common core
2024
- Data Camp
Data analytics in Excel, SQL and PowerBI
Completed in 2024
- KPI Technical Lyceum
Completed in 2018
- Coursera
Battery science courses

PROFILE

Hey, I'm Igor, I'm a second-year student of CTU(ČVUT) of faculty of electrical engineering. I have an interest in many things: C/C++, embedded, power engineering, semiconductors, data analytics and ML, energetics and batteries(especially ESS!), application on lasers, PLC programming. I know that it looks like a vast, unconnected range of topics. But! Luckily, I was able to have some knowledge on land experience(at least at some level) in most of the topics either through my university studies, courses I took, School42 or works I've done. My interests are many, yet I want to finally stick with something and develop professionally, and I hope Your company can be the place for this.

SKILLS

- C/C++ languages
- Python
- SQL
- Algorithm creation
- Data analysis
- PowerBI, Excel
- Electrical measurements
- Battery testing
- Quality control testing.
- Material science
- Low-level programming
- Electromagnetic field theory
- Circuit fundamentals
- Probability and statistics

LANGUAGES

- Ukrainian(native)
- Russian(native)
- English(C1, 7.5 IELTS)
- Czech(B1-B2)

Relevant Work Experience

Aug 2025 - Sep 2025

ELI-ERIC(ELI-BEAMS)

Python programmer internship

- Testing the MonteCarlo visualization program
- Enhancing the program, writing the code, bug testing
- Consulting on performance
