MORE ABOUT ME

I build web and mobile applications using C#, .NET (including ASP.NET), Python, Django, React, and React Native. My experience includes developing REST APIs, working with SQL databases, creating responsive user interfaces, and implementing authentication and data management systems. Also familiar with Unity Game Developing and Game Design.

PORTFOLIO

Translator

<https://pv411kh3.azurewebsites.net/>

- Built a web-based translator application using ASP.NET.
- Integrated Azure Cosmos DB for user authentication and data storage.
- Deployed the full solution on Microsoft Azure, enabling continuous availability.

SocialNetwork

<https://zealous-coast-02bfa1803.7.azurestaticapps.net/>

- Built a full-stack social networking web application using React with TypeScript and ASP.NET Core.
- Developed RESTful APIs and integrated Entity Framework Core for efficient database management and data operations.
- Implemented user authentication, profile management, post creation, image uploading, and user communication features.
- Designed interactive frontend components with modern React architecture and responsive UI principles.
- Deployed the complete application on Microsoft Azure, ensuring reliable cloud hosting and continuous availability.
